

# PRO SYSTEMS VIRTUAL REALITY

## Ixfinity VR Products **New!**

### Ixfinity Mobile 3D

The **Ixfinity Mobile** is the first all in one Passive Stereo projection system. It is the solution for all your real-time 3D graphics and video presentation.

Any active stereo source connected to the **Ixfinity Mobile** is automatically converted into a passive 3D presentation. With low-cost polarized glasses a medium to large number of people can experience the true value of stereographic pictures.

A special designed on-board interface ensures the conversion of one active stereo signals into a passive stereo presentation.

Two high performance single chip DLP projectors are integrated to provide crystal clear images. Special optical offset of the projectors ensures best image alignment.

One serial port controls the whole system. Alignment, color settings source control is all done by simple commands. Free PC software is available to setup system and to program special user requirements.

An optional user friendly remote control is available for desk operation

#### Applications:

Medical:	Projection of real live 3D images from MRI and PET scanners
Oil & Gas:	Detailed analysis of potential drilling locations
Architectural:	Walk through buildings and projects before they are realized
New Designs:	Product design with Virtual Reality. Verification of complex 3D assemblies of mechanical components

### Ixfinity Mobile 3D SXGA system contents:

- 2 x DLP projectors SXGA
  - Native Resolution : 1280 x 1024
  - Brightness : 2 x 3000 ANSI Lumen
  - Contrast : 1000 : 1 (black on/off)
  - Projection Lens : F=31, 1-39,2 mm
  - Dimensions H / L / W : 42 x 38 x 35
  - Stereo optimized
- Stereo decoder/controller
  - Info display
  - projector control
  - Serial port for remote, Crestron or AMX
- Linear Polarized Filters
- 10 Polarized glasses
- 180x 180 cm 3D silver screen

Desk remote control  
*optional*
